

**FIELD DUTY
TYPE II**

www.medtecarambulance.com

Even when budgets are tight, you can still afford one of the best.
 The Field Duty from Medtec.

**FIELD DUTY
TYPE II**

TYPE II

The Field Duty ambulance from Medtec delivers the quality and custom features you would expect in a higher-priced unit. It can stand up to daily challenges, handle a lot of road and still give you years of outstanding performance.

Its interior design is efficient. Cabinet walls follow the contour of the exterior body to maximize storage and allow for full-depth adjustable shelving. Every inch of wall has a purpose, and you still have enough space to care for your patient. Oxygen storage recessed into the floor helps lower the center of gravity, giving you more control and stability at any speed.

This ambulance comes with a long list of standard features, from providing enough space to do your job to a lifetime electrical warranty. The Field Duty Type II from Medtec gives you a lot of options you don't usually see in a Type II. Which means that even when budgets are tight, you can still afford one of the best. You can still afford a Medtec.®

CHASSIS
